Important to Parents and Teachers. The English language is, perhaps, more difficult than any other to spell and pronounce correctly. For these indi-pensable requisites to English scholarship, we are indebted to the dictionaries for the language. It has so many anomalies, that it has been deemed almost impossi de to establish a set of rules, either for spelling or propourcing it; and bence we have been forced to acquire this knowledge, almost without rules and word by word. And to this the imperfection of our alphabet, and the vast number of words in our language, and we can readily comprehend the difficulties under which our children labor in this behalf. Guided by the ordinary school books, the child progresses from letters to syllabl s, and from these to words by slow and uncertain step; and when he has hoppily gone through the spelling book, he has advanced only so far as his memory retains the impression of each word and its particular sound-beyond this he knows nothing. To supply a set of rules, and to complete the alphabet by defining distinctly, the different sounds of the same letters and the vowel combinations, so as to meet the demands of the organs of

speech and voice whereby the difficulti s to which

This, we think we can safely say, has been done by the Rev. WM. MULERY, of this city. He has been a teacher and student of trissubject for at out forty years, and has recently given to the public the ripened fruits of all his accumulated experience and study, in the shape of a series of charts and spelling and reading books. By these, the child is first made acquainted with the letters and elemen tary combinations, representing the forty-one sounds of which the human voice is capable-these are elementary and are the same in every combination. He then proceeds to syllables, thence to words and thence to reading. To these he adds per-picuous rules for syllabication and accent. So, that when the child has learned to spell, he has mustered the whole subject of orthography and orthoepy, and can apply his knowledge with mathematical precision and certainty. The charts are suited to oral instruction, where by a class of an hundred can be taught in the same time and with the same case that a single one may be. The matter of the books is so disposed and arranged, that every step leads to and strengthens the next, so to speak; each lesson helps on to the next. By this sy-tem, the child learns both the theory and practice, and when he his gone through the spelling books, he will be able to divide any word into its proper syllables and give It the appropriate accents, without the aid of a dictionary. How many really accomplished scholars in our land, who cannot de as much! The system of BLANK BOOKS! Mr MULKEY, is, indeed, a plain system of Phoneties, and compasses every object, claimed by those who advocate, a phonetic alphabet, containing forty-one instead of twenty-six characters or letters.

We have refered thus particularly to the works of Mr. MULERT in the hope of attracting the attention of those leaving the education and training of youths, to the subject, and with a sincere desire that the rising generation may resp its beneats. For his assiduous and successful labors the author is entitled to the public gratitude, and will doubtless receive it. We are pleased to see that his works have been introduced into the public schools of Nashville, and the show have received the approval and commendation any of the best scholars in the State. We most cheerfully recommend them to the attention and lavor of teachers and parents throughou, the country.

CHRISTAIN CHURCH PROPERTY. - That valuable property where the Christain Church lately stood, on Cherry street, a few steps south of Spring street, will be offered for sale to-day at 11 o'clork. It will be recollected that this property is situated in the immediate vicinity of the ground where the Custom House, Post office, and other fine buildings are to be erected. Business is tending that way, and there can be no doubt that a few months only, will elapse, before all that contiguous to the corners of Cherry and Spruce streets, will be even more valuable than it is now.

City Hotel. Crooker's Millinery Establishment. We doubt whether the fair dames and belies of Nashville have ever experienced so much difficulty in the selection of a bonnet, as this season, a this establishment. The cause is not to be found in the increased fastidiousness or captionaness of their tes es, nor in the paucity of the stock or inelegance of the styles. No; we must look for it in some other quarter. Their funcies, to tell the truth, have been bewildered by the great variety and beauty of the assortment to choose from. They experience such sensations while beholding it, as one feels in a rich conservatory surrounded by the rarest exotics, andlaved in their delicious perfumes. They have such emotions as led the poet to wish that the lips of all womankind, especially the beauties, were condens d into one pretry pouting pair that he might, in kissing them, kiss the whole race. Where there is so much elegance, so great a variety, a choice must be difficult. The thing's natural; and the dear creatures are not to blame. But not of bonnets alone does Crooker's congress consist. Nearly all descriptions of millinery goods are represented there-from the lightest and most etherial to the heavier fabrics which art produces to adorn the loveliest of pature's handiworks. a 15 sf

Age and Bebility. As old age comes creeping on, it brings with it many at-tendant infirmities. Loss of appetite and weakness im pair the health, and want of activity makes the mind discontented and unit appy. In cases where old age adds its in fluence, it is almost impossible to add vigor and health, and although many remedies have been tried, all have falled, until BERHAVE'S HOLLAND BLITERS were known and used. In every case where they ha e been emplayed, they have invariably given strength and restored the appetite. They have become a great agent for this alone, and are used b) many people who are suffering from loss of appetite and general debility. In cases of long standing chronic diseases, they act as a charm, invigorating the system, thus giving nature another opportunity to repair physical injuries. A COMBINED REAPER AND MOWER PATENTED NOVEMBER 25, 1856.

THIS MACHINE was introduced and used for the first time during the harvest of 1856, and, though new, it less a ready established for itself a reputation which has never been reached by any other Combined Reaper and Market, and it now occupies a position far in advance of all its competitors.

Some valuable improvements suggested by careful observation and experiment during the last barvest have been ment to this Machine, which will be added to all of these Reapers and Mowers now building for the barvest of 1857. ADJESTABILITY.

This Machine can be changed from a Reaper to a Mower in five minutes, and when at work can be altered to any ... The following Premiums have been awarded to this Machine during and since the harvest of 181 First Premium as a Mower, over Manny's Machine, ox TRIAL, before the Committee of the Eminence Association, First Premium as a Reaper and as a Combined Reaper and Mower, over Manny's Machine, on TRIAL, before the Committee if the South-Western Agricultural and Mechanica: Association, Louis-lile, Ry.; First Premium as a Reaper, over the Nork Hand-Raxing Resper, the New York Self Raking Resper, and Manny's Machine, at the Kentucay State Fair, hat Paris, October, 1856: al-o, an entire Premium as a Combined Reaper and Mower, over Manny's Machine, at the same First Machine is got up at a Greatest expense, is made of better materials (being chiefly of wholesmit is the same for finish, and is more durable than any other Harvester, while at the same time the price is as low as that asked for a most ordinary Combined Machines.

PATENT ELASTIC FIRE & WATER-PROOF

CEMENT ROOFING. THE undersigned are prepared to introduce into use in Tenness-e W. E. CHILDS & CO.'S PATENT BLAS-TIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of architects, Builders, Railroad Com-panies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fail to

examine this Ro. Rog, as it is better and chesper than any thing in use. The material forms a hard and smooth sur-face that will resist the action of the atmosphere in every climate. It is impervious to water, clast c, and flexible. It contracts and expands with the changes of the a mos-phere, and will neither example, crack nor rot; and, as to tar in ability, there is no operation. It is practically imperiabable, and will perfectfully resist any ordinary external exposure to fire, as is abandantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old shineles, tar and gravel, tin, sinc, copper, or iron reads—it making no difference how steep or flat they may be for seven dollars per one hundred square feet, it being far cheaper than any Roof of the old style, and we are sure it

will sive better satisfaction.

It will also be found to be the best using ever invented to cover or mend old leaky tim, for any gravel roofs, or around chimneys, scuttles, dormar windows, and gutters, where the tin is runt d through. This Convent can be put on to last as long as stone, and form a perfect adjusted to any object to which it is applied. Tim Roofs can be painted over (and warranted not to leak) at two d liars and fifty cents. per hundred square feet, which is cheaper and much better than paint. This Soofing will be found to be the best thing for covering large Roofs where they are exposed to fire—such as Sieam Mills, Saw Mills, Fectories, Railroad Cars, Bridges, Depots, station Houses, Steambout Decks, and, in fact, every gind of Roof where there is an external er posure from fire. As the Roof is persent, without a joint in it, it presents no chance for fire to communicate, and any light substance will burn out without igniting. Insurance Offices at Choimnati, and other places where Childs 4 Co.'s Cement has been used, insure maid-

ings with Roofs covered eith this Cement, at the same rates as for those covered with Iron, Copper or Tin The Cement will be furnished to those at a distance
